

# GENDER EQUALITY:

## A CORNERSTONE FOR ENVIRONMENTAL AND CLIMATE JUSTICE

Climate change affects women and men, Girls and boys differently! Moreover, the existing gender inequalities and unequal access to natural resources increases vulnerability and compromises efforts towards climate change action.

There's need to facilitate conditions where women and men, Girls and Boys have equal rights and opportunities to realize their full potential towards enhancing a sustainable environment.

Inspire strong and stable families where justice and accountability in environmental and climate change matters flourish.
